DR. MARYANN PREWITT

AGE MANAGEMENT, FUNCTIONAL MEDICINE AND GYNECOLOGY

Some of us welcome the arrival of fall for football season and holiday parties. Others are relieved to have an excuse for high collars and scarves. You know which one you are.

Only a few years ago, if you wanted to do something about your aging neck, your options were limited. Either undergo cosmetic surgery for a traditional neck lift, which meant a hospital stay, missed work, and significant downtime. Or religiously apply creams and lotions to your neck and hope for the best. Neither choice was optimal.

Today, you can simply visit skinFIT, the MedSpa here at HealthWellnessMD. Our lasers are rapidly replacing the knife as the gold standard in anti-aging technology. We perform noninvasive face and neck treatments with surgical results—but without the scars.

We customize a protocol especially for you. Then stack various laser modalities to achieve a dramatic improvement in the laxity of the skin of the neck. Our age-reversing lasers stimulate new collagen production and improve the skin's elasticity for long-lasting and remarkable results. Plus, we treat you in the comfort of our MedSpa, procedures take less time, and then you are free to go about your day. So you can toss your turtlenecks, for good.
