

VAMPIRE PRP TREATMENTS

THE SECRETS OF CELEBRITY SKIN

You probably thought vampires were the only ones who harvested blood to stay young. But, Dr. Maryann Prewitt is doing it right here at our medical spa using the power of PRP Therapy. Because they utilize your own blood, PRP (platelet-rich plasma) procedures are nicknamed "Vampire" treatments. According to legend, vampires live forever by feeding on the blood of humans. Now, with PRP science, you too will approach eternal youth with the help of your own blood.

Do you know 3 signs of aging?

- Skin color becomes grey and dull from decreased blood flow
- Facial shape collapses and looks droopy as muscle and collagen decrease
- Skin texture becomes uneven and less smooth with wrinkles and deep grooves

All of these factors combine to make you look tired, wrinkled, and older than you feel. Vampire* treatments work by growth factors stimulating the production of new tissue and collagen anywhere on the body, resulting in increased circulation and suppleness. And your skin recaptures its vitality.

- Vampire FaceLift* uses a combination of fillers and PRP to optimize the shape and rejuvenate the skin of the face and neck
- Vampire Facial* to regenerate the skin of the face and neck
- Vampire Breast Lift* to enhance the appearance of your cleavage
- PRP Hair Restoration to stimulate hair growth, increasing volume and thickness
- P-Shot* for male sexual performance and increased pleasure
- O-Shot* for increased sensation and improved orgasms for women

All of the Vampire* treatments are done with no surgery, no downtime, and best of all, natural-looking and striking results. We can't promise that you will achieve immortality, but Dr. Prewitt says you won't be scared to look in the mirror anymore.
